dasa60196@gmail.com • (347) 476-2500 • [LinkedIn](#) • [GitHub](#) • Queens, NY

EDUCATION

Georgia Institute of Technology | Atlanta, GA (Remote)

Expected 2026 – 2029

- Master of Science in Computer Science (Specialization: Computer Perception & Robotics)

CUNY City College of New York | New York, NY

2020 – 2024

- Bachelor of Science, Computer Science (Cum Laude)

PROFESSIONAL EXPERIENCE

Software Engineer | Con Edison (Leadership Development Program)

07/2025 – Present

- Administer **OpenShift/Kubernetes clusters**, maintaining **99% uptime** for critical distributed workloads.
- Built **CPU/GPU benchmarking & profiling suite** (Python) improving MTTR by 35% and guiding performance tuning for compute-heavy microservices.
- Led **root-cause analysis** for production incidents; reduced recurring failures and improved system-level diagnostics.
- Deployed and optimized **Python + C++ microservices** supporting high-throughput, real-time operational data flows.
- Worked with **IBM Expert Labs** to strengthen AI/inference pipelines, improving model-serving stability and data reliability.
- Implemented **RBAC, network policies, and GPU-related guardrails**, improving cluster resiliency and compliance.

Software Engineer | Mercor

06/2025 – 08/2025

- Delivered **30+ performance and reliability fixes** across Python, TypeScript, Rust, and C++.
- Reduced API latency through targeted refactoring and low-level debugging.
- Contributed to CI/CD, incident triage, and consistent production deployments.

Open Source Contributor | Bevy Game Engine

04/2025 – 08/2025

- Refactored **Vulkan rendering pipelines**, increasing GPU stability and cross-platform rendering performance.
- Collaborated with a 20k+ developer community on high-impact, maintainable OSS contributions.

Software Engineer Intern | Veterinary Initiative of Endangered Wildlife

04/2024 – 08/2024

- Built **Python RAG chatbot** (OpenAI + Ollama) for automated document retrieval.
- Developed **Mapbox dashboards** and UX prototypes for field-operations visibility.

Software Engineer Intern | Somasawa

10/2023 – 02/2024

- Delivered **Flutter + AWS educational platform** for 500+ users with backend + CI/CD integration.
- Reduced backend latency by **40%** via caching and server optimization.
- Designed responsive UI flows and reusable components in Figma.

Machine Learning Engineer Intern | Cornell University

06/2023 – 06/2024

- Built large-scale **TensorFlow pipelines** across datasets from 20+ organizations.
- Achieved **30% accuracy improvement** via feature engineering and training optimizations.
- Designed ML workflows that mimic production inference and deployment environments.

RESEARCH

Research Scientist | IBM Research

09/2025 – Present

- Conducting research on **multi-agent LLM systems**, cooperative inference, and safety validation on NASA CMAPSS engine datasets.
- Built structured evaluation pipelines using **vLLM, Hugging Face, Granite models**, and custom Python orchestration.
- Developed LLM workflows for **classification, RUL prediction, uncertainty analysis, model evaluation, and inference benchmarking**.
- Performed **GPU-accelerated inference profiling**, designing reproducible model-serving experiments.

PROJECTS

[CCNY Schedule Pro](#) | React Native + Rust

09/2024 – 05/2025

- Built real-time scheduling + messaging system for 500+ users using **WebSockets + encrypted TCP**.

[Rate My Professor API](#) | Rust Library

12/2024 – 01/2025

- Developed async **GraphQL wrapper** (Tokio + Serde); adopted by 600+ users in week one.

TECHNICAL SKILLS

Languages Python, C/C++, Rust, TypeScript

Deep Learning & GPU CUDA/cuTensor, TensorFlow, vLLM, Hugging Face, Granite models, GPU inference profiling

Frameworks & Tools FastAPI, Flask, LangChain, React Native, Next.js, IBM Watson

Simulation & Robotics ROS2, Nvidia Jetson Orin Nano
